**WHAT NATURE HAS
ALWAYS KNOWN**

A NATURAL WONDER

Silver is part of the natural world around us, and it's in our diet as a trace mineral found in whole grains, water and mushrooms. Silver is even inherently built into breastmilk, so from our very first moments, immune support is passed from mother to baby.

Silver has been used to promote health for more than 2,400 years. Long before modern medicine, silver was used for a broad range of healing and wellness:

SILVER IS BEING RE-DISCOVERED BY MORE AND MORE PEOPLE SEEKING NATURAL WAYS TO TAKE CONTROL OF THEIR HEALTH

BIO-ACTIVE SILVER HYDROSOL™

The Ultimate Refinement of Colloidal Silver™

With 20+ years of safe history, Sovereign Silver is the #1 selling silver supplement in the USA. It's clear, odorless and tasteless, making it super easy to take.

SAFE*

Our tiny particles are so powerful, a little goes a long way. With a low 10 ppm (parts per million) concentration in each dose, it's safe* for the whole family.

PURE

Only two ingredients: 99.999% pure silver and pharmaceutical-grade purified water. Plus, we package our Bio-Active Silver Hydrosol in non-leaching, amber glass bottles (never plastic) to keep it as pure and powerful as the day it was created.

EFFECTIVE*

Our proprietary manufacturing process creates the smallest silver particles ever seen (as small as 0.8 nanometers). They're "bio-active" which means they're positively charged with energy and ready to go to work. The result? Our Bio-Active Silver Hydrosol delivers a powerful army of very small particles, prepared to fight where needed.

SILVER RULE OF THUMB: Less is more. A little is safe, but too much is not recommended per the EPA.†

† According to the U.S. EPA data for Silver (CASRN 7440-22-4) daily Oral Silver Reference Dose (RfD) applied to 10 ppm, one may ingest 178,850 servings safely over 70 years.

🔑 Guidelines:

Maintenance*: 1 tsp daily (50 mcg/day)

Immune Building*: 3 tsp daily (150 mcg/day)

Long-Term Support*: 5 tsp daily (250 mcg/day)

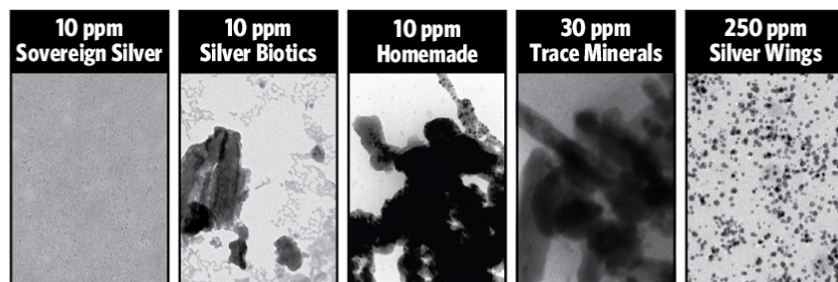

Short-Term Support*: 7 tsp daily (350 mcg/day)

7 DOSES OF SOVEREIGN SILVER CAN BE SAFELY TAKEN EVERY DAY FOR 70 YEARS.†

Sovereign Silver sets the benchmark for the industry with its purity, uniform small particle size and high percentage of bio-active silver: **about 9 billion particles of silver per teaspoon dose**. See it for yourself:

Magnified at 110,000x, it's easy to see the large, variable sizes of silver particles found in competitor brands, along with clumping that indicates neutral and useless particles. In comparison, the super fine particles of Sovereign Silver are barely detectable: no clumping, no inconsistency.

SILVER: SORTING FACT FROM FICTION

Let's talk about the top 4 misconceptions: what's real, what's not and what you really need to know.

MYTH: HIGHER PPM IS STRONGER

Sovereign Silver 10 ppm, with >98% bio-active silver, is 8x more effective than a 250 ppm product. Don't be misled by higher ppm products with high concentrations of wasted silver. Repeated doses of higher ppm products may surpass the 350 mcg/day of silver established by the Environmental Protection Agency (EPA).[†]

CONCENTRATION	TSP ONCE A DAY	POWER DOSE 7x DAILY
10 ppm	50 mcg	350 mcg
30 ppm	150 mcg	1,050 mcg
50 ppm	250 mcg	1,750 mcg
100 ppm	500 mcg	3,500 mcg
250 ppm	1,250 mcg	8,750 mcg

[†]According to the U.S. EPA data for Silver (CASRN 7440-22-4) daily Oral Silver Reference Dose (RfD) applied to 10 ppm, one may ingest 178,850 servings safely over 70 years.

MYTH: SILVER CAUSES ARGYRIA

Argyria is a rare, benign skin condition caused by the accumulation of impure forms of silver in the skin. These include high ppm (parts per million) and/or homemade colloidal silver products contaminated with silver compounds, especially silver salts and proteins. Sovereign Silver[®] is free from proteins, salts, or other compounds, and poses no risk of Argyria.

MYTH: SILVER IS A TOXIC HEAVY METAL

Sure, some heavy metals are toxic, and we bet you recognize them as such: mercury, aluminum, cadmium, lead and arsenic. But silver, in its purest form, is one of the non-toxic heavy metals with known benefits for the body, just like calcium, iron, zinc, magnesium and copper. And here's another fact: too much of anything can be harmful (even water), making it important to use high quality, low concentration silver products as directed.

MYTH: SILVER HARMS THE GOOD BACTERIA IN THE GUT

Scientific peer-reviewed literature has shown that silver does not disrupt the natural distribution of good gut flora[^].

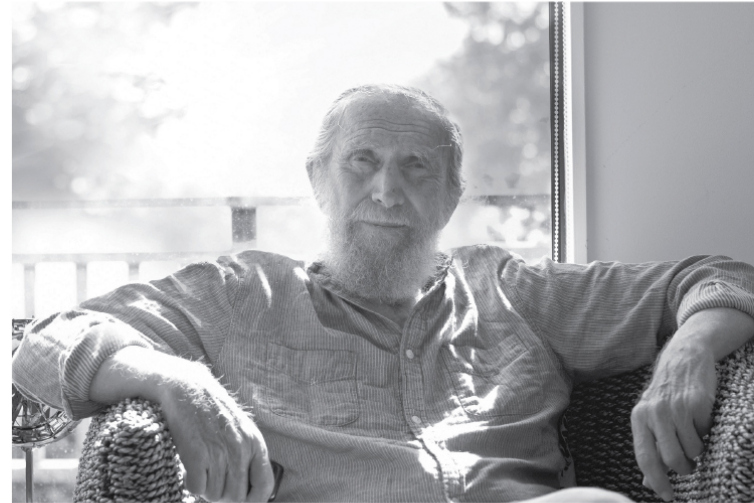

[^]Wilding, L.A., et al., Repeated dose (28-day) administration of silver nanoparticles of varied size and coating does not significantly alter the indigenous murine gut microbiome. *Nanotoxicology*, 2016. 10(5): p. 513-20.

"It is without hesitation that I support and applaud Natural Immunogenics for making a safe and pure silver product intended for daily consumer use."
