

Mg-Zyme™

For Healthcare Professionals Only

Biotics Research Corporation has formulated Mg-Zyme™ with an ideal blend of three forms of magnesium recognized for their bioavailability and decreased risk of gastric distress.

Mg-Zyme™ is a source of supplemental magnesium, supplied as mixed mineral chelates. Adequate magnesium intake is of utmost importance, as it is critical to most ATP-dependent reactions. Magnesium is important for musculoskeletal health, for proper cardiac and immune function, and for the maintenance of healthy blood sugar levels. Dietary intakes below recommended levels are common.

- ✓ The cardiovascular system, nervous system, muscles, kidneys, liver, brain, hormone-secreting glands, and gastrointestinal tract all rely on magnesium for their metabolic function.
- ✓ Decreased “absorption of Mg has been associated with individuals having gastrointestinal dysfunction, renal impairment, alcoholism or glucose metabolism disorders.
- ✓ Due to its importance in many bodily systems, and the fact that dietary intake is usually inadequate to meet even basic bodily requirements, supplemental magnesium is a judicious choice for healthcare practitioners.
- ✓ Magnesium can safely be incorporated into all patient regimens, as a means to both address deficiency and to promote wellbeing.
- ✓ The forms of magnesium in **Mg-Zyme™** are recognized as having excellent bio-availability and absorption.

Recommended dosage is one (1) capsule, each day as a dietary supplement or as otherwise directed by a healthcare professional.

Mg-Zyme™

Supplement Facts

Serving Size: 1 Capsule	Servings Per Container: 100	
	Amount Per Serving	% Daily Value
Magnesium (as magnesium aspartate, magnesium glycinate and magnesium gluconate)	100 mg	25%

Other ingredients: Capsule shell (gelatin and water), organic vegetable culture†, magnesium stearate (vegetable source) and stearic acid (vegetable source).

† Specially grown, biologically active vegetable culture containing naturally associated phytochemicals including polyphenolic compounds with SOD and catalase, dehydrated at low temperature to preserve associated enzyme factors.

This product is gluten and dairy free.
