

Renal Plus™

For Healthcare Professionals Only

The kidneys, which are regulated by means of hormonal control, function to filter the blood and eliminate (excrete) metabolic waste products, including excess water, electrolytes and sodium, via the urine. They are also responsible for the excretion of many drug metabolites.

The three key hormones produced by the kidneys are calcitriol, erythropoietin and renin. Calcitriol, 1,25 dihydroxycholecalciferol, the active form of Vitamin D, serves to regulate the absorption of calcium and phosphate, thus promoting the formation of strong bones. Erythropoietin (EPO) stimulates the bone marrow to produce red blood cells, while renin serves to regulate blood volume, thus playing an important role in the regulation of blood pressure. Additionally, the production of aldosterone by the adrenal glands is principally modulated by the renin-angiotensin system along with serum potassium. Experimental and clinical studies have demonstrated the importance of the renin-angiotensin system (RAS) and the pathogenesis of atherosclerosis, as well as the prognosis of coronary heart disease (CHD).

- **Uva ursi** (*Arctostaphylos uva ursi*) supplies a source of arbutin, flavonoids, such as ellagic acid, Quercetin, an essential oil, and phenolic glycosides.
- **Buchu leaf** (*Agathosma betulina*) - is a source of diosphoenol and terpenoids, including limonene, dipentene and menthone, together with diosmin and other flavonoid glycosides.
- **Echinacea** (*Echinacea angustifolia*) - is a source of inulin and other polysaccharides that support T-cell activation and reproduction.
- **Cranberry** - a source of mannose, is believed to inhibit bacterial adherence to the lining of the bladder and urethra.

Renal Plus™

Renal Plus™ provides botanical, glandular and nutritional support for optimal renal function. **Renal Plus™** also provides optimal nutritional support for the urological system, including specific vitamins, minerals, and neonatal glandulars, in a unique botanical blend.

Recommended dosage is two (2) tablets taken three (3) times each day as a dietary supplement or as otherwise directed by a healthcare professional.

Caution: Not recommended for pregnant or lactating women.

Supplement Facts

Serving Size: 2 Tablets
Servings Per Container: 90

	Amount Per Serving	% Daily Value
Vitamin A (as palmitate)	1,000 IU	20%
Vitamin C (as ascorbic acid)	120 mg	200%
Vitamin B ₆ (as pyridoxal-5-phosphate)	3 mg	150%
Magnesium (as magnesium citrate, gluconate and glycinate)	50 mg	13%
Neonatal Kidney (bovine)	100 mg	*
Neonatal Thymus (bovine)	10 mg	*
Neonatal Liver (bovine)	10 mg	*
Uva-ursi (<i>Arctostaphylos uva-ursi</i>) (leaf)	50 mg	*
Buchu Extract (4:1) (<i>Agathosma crenulata</i>) (leaf)	50 mg	*
Echinacea <i>angustifolia</i> (root)	50 mg	*
Proprietary Blend	85 mg	
Organic Vegetable Culture †*		
Spanish Moss (<i>Tilandsia usneoides</i>) (whole)*		
Cranberry Extract (<i>Vaccinium macrocarpon</i>) (fruit)*		

*Daily Value not established

Other ingredients: Stearic acid (vegetable source), modified cellulose gum, magnesium stearate (vegetable source), silica and food glaze.

† Specially grown, biologically active vegetable culture containing naturally associated phytochemicals including polyphenolic compounds with SOD and catalase, dehydrated at low temperature to preserve associated enzyme factors.
